Corrigendum C1 to the regulation SIA 103:2003 en (1st edition 2003-06)

Page	Section Figure	Up to now (Errors: letters written in bold and crossed out)	Corrections (Corrections: letters written in bold, italic letters)
54	7.2.1	$T_m = B \times p/100 \times n \times q/100 \times r$	$T_m = B_a \times p/100 \times n \times q/100 \times r$
59	7.13.2	This rule does not apply for repeated individual supporting elements or parts of overall building structures. Such repetitions shall be taken into account when agreeing the degree of difficulty for the fee (H, Art. 7.4) .	This rule does not apply for repeated individual supporting elements or parts of overall building structures. Such repetitions shall be taken into account when agreeing the degree of difficulty (<i>n</i> , Art. 7.7).
60	7.16.2	If the engineer put in charge of the general project management also takes on tasks as a specialist, the provisions of Art. 7.16.2 apply.	If the engineer put in charge of the general project management also takes on tasks as a specialist, the provisions of Art. 7.15.2 apply.
60	7.16.3	In the case of building structures or systems, of which the majority are support structures in terms of function and purpose (e.g., bridges, supporting walls), the corresponding performance of the engineer is not treated as a specialist activity according to Art. 7.16.2 .	In the case of building structures or systems, of which the majority are support structures in terms of function and purpose (e.g., bridges, supporting walls), the corresponding performance of the engineer is not treated as a specialist activity according to Art. 7.15.2 .
